

Subject: Info for June 10 BDCP Yolo Basin Fishery Enhancement Planning Team Meeting

Hello Everyone.

Attached you will find an updated agenda that includes the conference call dial up number, and which is slightly reorganized for efficiency (but nothing added or deleted).

You will also find the most recent version of Conservation Measure 2. The yellow highlights indicate areas where more discussion is likely needed, and the green text indicates areas where there have been some changes based on conversations with stakeholders since previous versions. Please note that this language is still preliminary, and even though some changes have been made since earlier versions based on stakeholder input, no one has yet agreed to it.

Looking forward to seeing you on Friday. Please let me or Karla know if you have any questions.

Janet
