

Dear Governance Working Group Member

Our first meeting will be in Sacramento on Thursday, June 9 from 2-5 pm

Attached is a redline re-draft of Chapter 7, which we will be discussing at our meeting.

The question of what sort of permit the water contractors should have is still under discussion between the biological agencies and the contractors. Once those discussions are complete, we can accommodate the results in the flexible framework proposed in this chapter.

In our deliberations, until those questions are resolved, I suggest we work on other issues. It would be most helpful to get from each of you (and others reviewing this document) your comments and suggested agenda items for the meeting.

Jerry Meral
