

BDCP Important Related Actions

Important Related Actions (IRAs): Former conservation measures removed from the BDCP

Analysis Results

1. **Conservation Measure (CM): Determine whether endocrine disrupting compounds have adverse direct and/or indirect effects on BDCP covered species.**
2. **CM: Reduce the load of agricultural pesticides and herbicides toxic to covered fish species and their food organisms**
3. **CM: Reduce the loads of toxic contaminants in stormwater and urban runoff**
4. **CM: Reduce the risk for future introductions of non-native aquatic organisms from recreational watercraft, *and***
CM: Improve the rapid detection of and rapid response to new non-native species introductions
5. **CM: Increase the harvest of non-native predatory fish to decrease their abundance**
6. **CM: Implement a Chinook salmon mark-select fishery**
7. **CM: Determine whether ammonia and ammonium have adverse direct and/or indirect effects on BDCP covered species**
