Dear Sirs,

Let get to the point, the reason for Bill 1253 is to raise the salinity in the rivers by pumping more water from up the river that is the Sacramento. Water salinity have to meet levels for fish, so if levels are high you can't pump fish, so if levels are high you can't pump. Don't beat around the bush and blame the striped bass for your failure to save the salmon in the pumps and all the other fish.
