Figure 23-1
FRA and FTA Allowable Increase in Cumulative Noise Level

- | | |
|--|---|
| <p> Normally Acceptable
Specified land use is satisfactory based upon the assumption that any buildings involved are of normal conventional construction without any special noise insulation requirements.</p> <p> Conditionally Acceptable
New construction or development should be undertaken only after a detailed analysis of the noise-reduction requirements is made, and needed noise insulation features are included in the design. Conventional construction, but with closed windows and fresh air supply systems or air conditioning, will normally suffice.</p> | <p> Normally Unacceptable
New construction or development should generally be discouraged. If new construction or development does proceed, a detailed analysis of the noise-reduction requirements must be made, and needed noise insulation features must be included in the design.</p> <p> Clearly Unacceptable
New construction or development should generally not be undertaken.</p> |
