Dear People,
This is the time to put our resources into restoring the Sacramento-San Joaquin Delta and its ecosystem. California must deal with fixing our broken Delta, which in its current condition, cannot support our environment or our economy.

Whether it's the drought, reduced pumping through the Delta or our half-empty reservoirs, everyone can see that we haven't done enough to protect California's water for the future. The Sacramento San-Joaquin Delta is home to more than 750 plant and animal species - 5 of which are endangered - and provides 25 million Californians with drinking water. We cannot wait for disaster to strike and jeopardize the well-being of our state's environmental and economic foundations - we must take action now.

Thanks,
Marian
