

10/21/15 RECIRC2342.

Sirs,

This is my first letter of protest that I've ever written. I feel so strongly about this issue! I live in the San Joaquin Valley. Any direction from my city I can see farms, dairy cows, orchards, grape vines.

My husband and I used to have a small trailer in the delta for recreation. As far as you could see there was agriculture. The pear orchards of Courtland, the first sweet corn of the season from Brentwood, the asparagus from Victoria Island, tomatoes, pumpkins, fifty pound bags of red potatoes in the fall, etc. The list is too long to name.

I have seen the Owens Valley and what the "water grab" for Los Angeles did to it. The "Twin Tunnels" is nothing but another "water grab" for southern California and Los Angeles. I personally feel it's political as payment for votes.

Why destroy one region of our state just to pacify another? Spend the money for de-salination plants after you find a safe place to put all the salt.

I'm old but I have an extended family who will be affected by this.

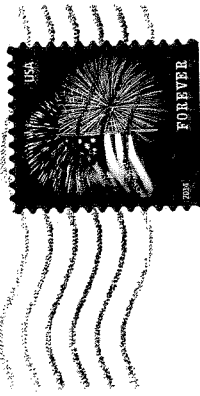

I can accept Gov. Brown's "crazy train" but the Twin Tunnels is a fiasco!!
