BDCP/Water Fix Comments

P.O. Box 1919

Sacramento, CA 95812

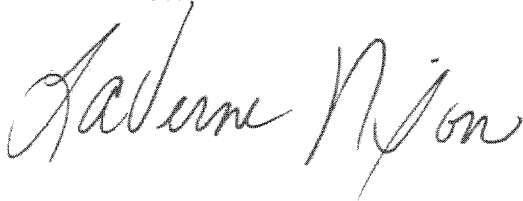

I say NO to the water intakes and NO to the Tunnels. I thought the government was ran by the people. What happened?

The Old saying "Don't mess with Mother Nature" will be so evident if these intakes and Tunnels are built to take Fresh Water out of the Sacramento River. Common sense tells me if you pump a large volume of water out thru tunnels underground, as the tide rises Salt Water will move in to take the place of Fresh Water. This will disrupt and destroy the Delta as we know it. What will happen to the Fresh Water species, Birds and Wild Life? What about Farming? I don't know of many crops that can grow on Salt Water. Why is it so difficult for College Educated Representative's to understand this common sense issue. I suspect preserving the environment has nothing to do with their intentions. Could it be Greed, Money, and Status?

With the wonderful scientific knowledge and engineering we are capable of today, I am sure we can come up with a much better solution to provide water to those in need, such as de-saltation and the Recycling Gray Water.

Respectfully

LaVerne Nixon
