Subject: Stop the California WaterFix - Review Alternatives That Will Protect the Delta

Dear BDCP/California WaterFix Comments,

Dear Resources Agency,

The California WaterFix will lead to the destruction of the Delta. I was opposed to the Peripheral Canal and continue to believe that this sort of large-scale diversion is wrong for California. There are many ways to conserve and recycle water at the local level - this State has a long history of research into these methods which your agency should study before taking action that will take away our valuable estuary and its resources.

Your DEIR/DEIS is flawed because it does not take into account ways to reduce the dependence on the Delta by increasing water independence locally.

Please stop the California WaterFix, and review more alternatives that will actually protect the Delta.

Sincerely,

Corwin

Your DEIR/DEIS is flawed because it does not take into account ways to reduce the dependence on the Delta by increasing water independence locally.

Please stop the California WaterFix, and review more alternatives that will actually protect the Delta.

This was a bad idea from the start and it still is a very bad idea. It will destroy very valuable estuaries and will not help the water situation. Water must be rationed. We in San Diego have saved over our share of water in our county...all counties need to do the same.

We need to stop the bottling of water by Nestle and other companies. WE need to make sure farmers are not allowing wasteful run off in their fields.

There are lots of things we can do until the rains come.

Sincerely,

Sprouse

Dear BDCP/California WaterFix Comments,

Dear Resources Agency,

The California WaterFix will lead to the destruction of the Delta.

Your DEIR/DEIS is flawed because it does not take into account ways to reduce the dependence on the Delta by increasing water independence locally.

Furthermore, water should not be extracted for export by companies such as Nestle that places private profit over public need; nor should water be extracted for "fracking" that increases climate warming gases and endangers the public health as well as the environment. Taking water from the Delta will destroy a permanent ecosystem to support a water supply for destructive industries until yet another ecosystem must be destroyed to support their demands. With 30 year droughts predicted for California, our water should be preserved for the future.

Please stop the California WaterFix, and review more alternatives that will actually protect the Delta.

Subject: Stop the California WaterFix - Review Alternatives That Will Protect the Delta

Dear BDCP/California WaterFix Comments,

Dear Resources Agency,

As a lifelong resident of California, I am asking you NOT to proceed with the plan to construct two water export tunnels under the "California WaterFix" project. Habitat restoration and strengthening of levees should proceed. But the concept of increased water export through gigantic tunnels is a solution rooted in the past. It ignores much better alternatives to provide Californians, both north and south, with the water they need. Furthermore, it does not address climate change.

Please focus your environmental reviews on better use of the water we do have. For example, subsidizing construction of residential and business greywater systems and upgrading municipal treatment systems to produce potable water.

Investing in the tunnels would constitute a massive misallocation of scarce resources. And it would not solve the problem. Climate change, rising temperatures, and decreased snowpack will mean less water available. Less water will irreparably damage the ecosystem of the San Francisco Bay Delta.

Investing in the EcoRestore program will do little good if increasing amounts of Delta water are siphoned off. And, if the twin tunnels were built, it is entirely reasonable to expect rising demand from irrigation districts and municipal water works, further relegating the Delta to simply be a water conveyance system.

Thank you for your attention.

Rebecca Franke

Sincerely,

Rebecca Franke

Subject: Stop the California WaterFix - Review Alternatives That Will Protect the Delta

Dear BDCP/California WaterFix Comments,

Dear Resources Agency,

The California WaterFix will lead to the destruction of the Delta.

Your DEIR/DEIS is flawed because it does not take into account ways to reduce the dependence on the Delta by increasing water independence locally.

Please stop the California WaterFix, and review more alternatives that will actually protect the Delta.

Instead of wasting ratepayer money on unnecessary new tunnels, our State and local water agencies should invest in rebuilding our crumbling local water and sewer infrastructure, cleaning and augmenting groundwater, expanding rainwater catchment systems, recycling water, and improving water efficiency in the residential, commercial, and agricultural sectors. Not only would these measures secure our water supply, they would improve water quality, prevent pollution and create long-term jobs.

The San Francisco Bay Delta is the hub of California's water system. The Delta is also a unique and priceless ecosystem that depends on flows through it. Depriving the Delta of flows through a diversion point on the Sacramento River will destroy the Delta habitat and economy.

The Tunnels represent a 20th century model of delivering water that won't work in the climate-change challenged present. Increasing temperatures will dramatically alter flow patterns as diminished snowpack becomes the new normal. Less water will be available for export at the same time that more water must be held to preserve salmon habitat and Delta water quality. Increased reliance on Delta exports that will not be available run contrary to preserving the ecosystem.

While some construction and planning jobs would be created to build the tunnels, this would come at the expense of jobs created in the communities where we live and work. In a tough economy, we know that ratepayers can only afford to pay so much. Thus, we should invest in fixing our failing local infrastructure, not helping finance a project that will primarily benefit large corporate interests.

Sincerely,

Jason Ellis

Dear BDCP/California WaterFix Comments,

Dear Resources Agency,

The California WaterFix will lead to the destruction of the Delta.

Your DEIR/DEIS is flawed because it does not take into account ways to reduce the dependence on the Delta by increasing water independence locally. ALL permits for housing tracts in the desert should be stopped. It is insane to allow development where water does not exist. Make no mistake, this is about property taxes the state wants. Our democratic run state will trade drinking water supplies during a drought for taxes

Please stop the California WaterFix, and review more alternatives that will actually protect the Delta.

Sincerely,

Lee Baldwin

Subject: Stop the California WaterFix - Review Alternatives That Will Protect the Delta

Dear BDCP/California WaterFix Comments,

Dear Resources Agency,

I believe the California WaterFix will lead to the destruction of the Delta. It is not environmentally feasible that Delta water can serve the needs of the whole state--particularly the needs of the desert areas of the southern part of the state. It's time we started living within some of the environmental restrictions of the areas within which we live. Please do not make a mess of one environmental area just to serve the insatiable needs of another area. We have seen too many estuaries in the states and world ruined because of similar projects.

Your DEIR/DEIS is flawed because it does not take into account ways to reduce the dependence on the Delta by increasing water independence locally.

Please stop the California WaterFix, and review more alternatives that will actually protect the Delta.

Sincerely,

Dear BDCP/California WaterFix Comments,

Dear Resources Agency,

The California WaterFix will lead to the destruction of the Delta.

Your DEIR/DEIS is flawed because it does not take into account ways to reduce the dependence on the Delta by increasing water independence locally.

Please stop the California WaterFix, and review more alternatives that will actually protect the Delta. Pumping water all over the state is a bad idea on many levels. We waste enough electricity and cause enough messes playing water shuffle as it is. The "fix" that should be under consideration is dramatically reducing water use -- even if it means cutting off Big Ag and making them figure out how to dry farm.

Sincerely,

Barquist

Subject: Stop the California WaterFix - Review Alternatives That Will Protect the Delta

Dear BDCP/California WaterFix Comments,

Dear Resources Agency,

The California WaterFix will lead to the destruction of the Delta. THIS IS NOT PROPERLY MAINTAINING THE DELTA, THIS PROJECT TIS TO SEND ALL THE WATER POSSIBLE TO SO CALIF. YOU WOULD BE DESTROYING THE DELTA FOR WESTLAND WATER USERS. YOU WOULD BE DESTROYING THE FISHERIES DEPENDENT ON THE DELTA. YOU WOULD DESTROY THE 150 DELTA FARMS THAT WE NEED AND THAT ARE IN THE APPROPRIATE LOCATION FOR THE FOOD THAT WE NEED, NOT ALMONDS. SUPPORT OUR DELTA FARMS AND OUR FISHERIES FOR A CHANGE

Your DEIR/DEIS is flawed because it does not take into account ways to reduce the dependence on the Delta by increasing water independence locally.

Please stop the California WaterFix, and review more alternatives that will actually protect the Delta.

Dear BDCP/California WaterFix Comments,

Dear Resources Agency,

The California WaterFix will lead to the destruction of the Delta.

Your DEIR/DEIS is flawed because it does not take into account ways to reduce the dependence on the Delta by increasing water independence locally.

Having water bypass the Delta will take needed flows away from fish, birds, and wildlife. The loss of the largest estuary on the West Coast of North America is not worth the cost of a pair of new tunnels.

Already 75% of native California fish species are in trouble, removing and redirecting additional water from our natural water ways will only exacerbate the problem.

Please stop the California WaterFix, and review more reasonable alternatives that will protect the Delta and the wildlife who depend on it to survive.

We require some innovative Californian thinking about this problem, that does not imperil our degraded environment.

Sincerely,

Henley

Dear BDCP/California WaterFix Comments,

Dear Resources Agency,

The California WaterFix will lead to the destruction of the Delta. We cannot keep using more water from environmentally sensitive areas to solve our internal problems of burgeoning population and the waste of a precious resource.

Your DEIR/DEIS is flawed because it does not take into account ways to reduce the dependence on the Delta by increasing water independence locally.

Please stop the California WaterFix, and review more alternatives that will actually protect the Delta.
