**Dear Jerry:**

**Thank you for the efforts that you, your state and federal agency colleagues, and the Administration have made to bring the BDCP to the point where it stands today. We appreciate the opportunity that the release of an administrative draft of the BDCP affords us to provide comments and questions that should be addressed in the next draft. This letter is a follow-up to the Water Authority's previous correspondence on BDCP Chapter 8, and conversations we have had with you over the past year.**

**Like many other stakeholders, the San Diego County Water Authority anticipated the May 29 release of the final chapters of the administrative draft of the BDCP document and believed, based upon earlier representations, it would address the questions and concerns the Water Authority has raised over the past several years over project financing. In particular, we were anxious to review the new draft of Chapter 8 in light of the correspondence we sent you 11 months ago (attached), in which we raised a series of BDCP financing issues and concerns. Our subsequent conversations led us to believe these concerns would be addressed in the most current iteration of Chapter 8. Instead, and disappointingly, Chapter 8 begins with this jarring admission:**

***"Details of the financing... are still being determined through on-going discussion between the state and federal governments and between the government, the state and federal water contractors and other interests."***

**After reviewing the newly-revised Chapter 8 of the BDCP administrative draft, seven years into the BDCP planning process, and nearly a year after commenting on the prior draft, the most critical financing issues confronting the BDCP have yet to be addressed.**

**As we shared with you previously, potential participants in the BDCP must have sufficiently detailed information to evaluate the cost-benefit (or feasibility) of participating in the project. We recently heard David Sunding report to the Metropolitan Water District of Southern California's (MWD) Board of Directors that a cost-benefit analysis has been produced for all urban and agricultural water contractors, and that it includes an urban cost-benefit analysis for all MWD member agencies. Would you please send a copy of the complete report to me in advance of Dr. Sunding's Sept. 12 appearance before our Board's Imported Water Committee?**

**OTHER REPRESENTATIVE**

- County of San Diego

*A public agency providing a safe and reliable water supply to the San Diego region*

As we have consistently stated, the Water Authority believes that any BDCP financing plan must include enforceable agreements to pay for the project, not only from state water contractors directly, but also from the member agencies or units that provide their revenues. The costs are far too high to simply rely on the hope that the contractors' water sales will be adequate over the long-term to pay the project's costs.

As the largest customer of the largest state water contractor – MWD – the Water Authority's member agency ratepayers have a great deal at stake in the BDCP process and its financing plan, its risks and contingencies. The Water Authority must be able to assess that the preferred alternative advocated by the BDCP program will provide sufficient benefits to be affordable for our member agency ratepayers. We also must ensure that our ratepayers are not at risk of paying BDCP costs associated with the water supplies of other MWD member agencies or other state or federal water contractors. The Water Authority is already in litigation with MWD over how it allocates its *current* State Water Project costs.

The Water Authority is concerned that future progress of the BDCP and efforts to resolve seemingly intractable conflicts in the Delta will falter if those expected to be participants in the BDCP are not able to evaluate the cost-benefit of the various alternatives or reasonably limit the risk that their ratepayers will be expected to assume. In this context, we renew our request that our comments and concerns raised in our August 28, 2012 correspondence regarding Chapter 8 of the BDCP administrative draft – *Implementation Costs and Funding Sources* – be addressed in the next draft.

#### **Comments**

In our August 28, 2012 correspondence, we identified three specific issue areas as lacking necessary discussion within Chapter 8:

- State water contractors that are wholesale water agencies should demonstrate that their customers – the member agencies or units that purchase their water and provide their revenue – have take-or-pay contracts or other enforceable, long-term commitments to pay the fixed costs of the project commensurate with the term of the BDCP obligation.
- It is important to analyze the possible effects of “step up” provisions – those bond pledges that may require other BDCP participants to assume the obligations of defaulting participants – on MWD and other participants in the BDCP.
- A careful legal analysis should be undertaken of MWD taxing authority within the BDCP due diligence process, to examine the feasibility and appropriateness of relying upon property taxes as additional back-up security for project debt.

#### **Take-Or-Pay Contracts/Enforceable Commitments**

As we have previously pointed out in discussions with you, MWD – which, as the largest state water contracting agency, is the foundation for financing the BDCP project – has been struggling over the past several years to pay its current fixed costs, let alone a substantially larger new cost associated with the BDCP. More than 80 percent of MWD's costs are fixed – however, less than 20 percent of MWD's revenues are paid from fixed charges. Conversely, more than 80 percent of MWD's revenues are from water sales – a variable revenue source – and those sales have

declined by 30 percent since 2007. Furthermore, MWD's member agencies are not required to purchase *any* water from MWD. The variability of water sales – and thus uncertain future water sales revenues – coupled with Southern California water agencies' current and future planned actions to implement the State's policy to reduce reliance on water supplies imported from the Delta, creates significant uncertainty regarding long-term financing of BDCP obligations. This should be a major concern for the State of California, whose full faith and credit will be expected to back up the financing of the project. And yet, Chapter 8 makes no mention of this material, foundational risk to BDCP financing.

The Water Authority believes that, at a minimum, state water contractors that are wholesale water agencies must demonstrate that their customers have take-or-pay contracts or other enforceable long-term commitments to pay the fixed costs of the BDCP project corresponding to the term of the BDCP obligation. The Water Authority continues to be prepared to make such a commitment to MWD as long as the Water Authority gets the water supplies in return for its payments. We also believe that the willingness to make a financial commitment to a Delta solution will largely determine the demand for Delta water supply, and therefore help inform the best sizing for the conveyance facility. It would not be in the state's best interest to construct a facility only to have it stranded because no one is willing to pay for it, or hoped-for water sales necessary to pay for it do not materialize.

#### “Step-Up” Provisions

Existing State Water Project contracts contain provisions under which non-defaulting contractors can be assessed to cover payments not made by defaulting contractors, up to 25 percent of the defaulting contractors' obligations. Additionally, the East Branch Extension of MWD's State Water Project contract has a provision obligating MWD to cover default by any and all other participants. These State Water Project contract stipulations are known as “step-up” provisions.

We are informed that bond underwriters for the BDCP project are expected to require a “step-up” provision by which each BDCP participant in BDCP-related bonds pledges to assume the obligations of defaulting participants. In fact, the newly-released Chapter 8, at Section 8.10.1.1.1 (page 8-81) provides that:

*“Existing water contracts would need to be amended to include the new costs of the BDCP assigned to the state water contractors and the repayment schedule.”*

Since “step-up” provisions are already embodied within, and apply to, MWD's State Water Project contract, it would appear that such provisions would apply to the “new costs of the BDCP assigned to the state water contractors.” Given those “step-up” provision obligations, we renew our request that Chapter 8 fully analyze the possible financial and economic effects of the “step-up” provisions on MWD and the other participants in the BDCP.

#### Property Taxes

Some have suggested that property taxes may be contemplated as back-up security for BDCP payment obligations of individual state water contractors. There are very clear and significant limitations in MWD's existing taxing authority under the provisions of the MWD Act:

- The Act limits MWD's ability to levy taxes to pay its State Water Project obligations.

Dr. Gerald Meral

July 30, 2013

Page 4

MWD is limited to levying taxes for *“the composite amount required to pay (1) the principal and interest on general obligation bonded indebtedness of the district and (2) that portion of the district’s payment obligation under [the SWP contract] which is reasonably allocable, as determined by the district, to the repayment by the state of principal and interest on [SWP bonds] as of [January 1, 1985] and used to finance construction of facilities for the benefit of the district.”*

- Although the Act contains override ability in the event of a fiscal crisis, as determined by the MWD board, the override is limited to only one year at a time. In such an event, the State of California and bondholders would be relying upon an annual vote of MWD’s Board of Directors in which it *“...finds that a tax in excess of these restrictions is essential to the fiscal integrity of the district....”*
- It is unclear whether changes to the limitations provided under the MWD Act would require voter approval and/or new legislation. Chapter 8 should address and answer these questions.

Given these limitations and uncertainties, it is difficult to consider MWD’s existing taxing authority as a meaningful back-up security for BDCP payment obligations. It is also highly questionable whether the financing of BDCP can be – or should be – backed by taxing authority that was authorized by voters decades ago, when the program was much different than is being discussed today. A careful legal analysis of MWD taxing authority should be included in the BDCP due diligence process if taxes are going to be relied upon as additional back-up security for BDCP project debt. The newly-released version of Chapter 8 is silent on this issue.

Based on the assurances that you previously provided to the Water Authority, we expected that the full consideration and analysis of the issues we have raised would be integrated in to the Chapter 8 analysis and conclusions. And yet, the current version of Chapter 8 of the BDCP administrative draft does not comprehensively or adequately conduct due diligence on all of the facts and circumstances described in this letter and our previous correspondence. We remain concerned that a potential cascading collapse of funding could occur if the proper due diligence is not undertaken in a timely manner.

We appreciate the opportunity to provide comments on the newly-released Chapter 8 of the BDCP administrative draft. We remain committed to working with you and all parties to evaluate, address, and resolve these critical financing issues.

Sincerely,

Maureen A. Stapleton  
General Manager
