March 2, 2009

Mr. Mike Chrisman, Secretary
California Natural Resources Agency
1416 Ninth Street, Suite 1311
Sacramento, CA 95814

Dear Mr. Chrisman and the Bay Delta Conservation Plan Steering Committee:

The Bay Delta Conservation Planning (BDCP) effort is considering actions that will have a profound impact on the Yolo Bypass. Two actions of great concern are: 1) modification of the Fremont Weir and Yolo Bypass to provide higher frequency and duration of inundation, and 2) large scale tidal marsh restoration in the Cache Slough area. On behalf of the Water Resources Association of Yolo County I urge you to ensure that the BDCP work engages the existing planning and management efforts in the Yolo Bypass, and specifically request that the newly formed Conservation Measures Committee of the Lower Yolo Bypass Planning Forum (Planning Forum) be consulted and utilized as the BDCP planning process proceeds.

The Water Resources Association of Yolo County (WRA) is a consortium of entities established to provide a regional forum to coordinate and facilitate solutions to water issues in Yolo County (Attachment A). In 2007, the WRA developed the Yolo County Integrated Regional Water Management plan which names the Yolo Bypass as one of eight integrated actions that are seen as major priorities for the planning area (Attachment B). The Yolo Bypass Integrated Project (YBIP) focuses on multiple related improvements including improvements in water quality, public and private wetlands, aquatic and riparian habitats and education and recreation in the Yolo Bypass. All of these improvements are developed in the context of maintaining and enhancing the flood control function of the Bypass. The WRA established the Yolo Bypass subgroup, a formal group of Bypass stakeholders, to coordinate YBIP actions. The Yolo Basin Foundation serves as the lead for the Yolo Bypass subgroup.

The Planning Forum has been established as a venue for working through various management issues in the Lower Bypass. The Planning Forum recently established the Conservation Measures Committee which is comprised of a diverse group of members (Attachment A) including the WRA's Yolo Bypass subgroup so that stakeholder interests throughout the length of the Bypass are involved.

The Conservation Measures Committee, supported by the broader Planning Forum and the WRA, provides an effective group of key stakeholders to assess and improve conservation measures being considered by the BDCP. The committee provides an entry point for communication with private landowners and offers the expertise and collective wisdom of many state and local agencies. We therefore believe that establishing the Conservation Measures Committee as an important point of contact for BDCP conservation measures in Yolo County will create an efficient partnership that
benefits both Yolo County interests and the State. The WRA recognizes the importance of regional partnerships to find solutions to Delta issues and looks forward to establishing a working partnership with those involved in the effort.

Please contact Robin Kulakow, Yolo Basin Foundation, (530) 756-7248, robin@yolobasin.org for more information regarding the Conservation Measures Committee of the Lower Yolo Bypass Planning Forum.

Sincerely,

William L. Marble, Chair
Water Resources Association of Yolo County

YOLO COUNTY
Integrated Regional Water Management Plan

EXECUTIVE SUMMARY
MAY 2007
Step 4. Creation of a Strategy for Implementation

Work plans for the foundational and integrated actions cover the next three to five years. The work plans identify the lead agencies or partners, the specific tasks or activities, and the anticipated budgets and timeframes. These are explained in detail in Section 7.0.

The principal elements of the institutional structure envisioned for implementing the IRWMP are presented in Figure ES-1.

The responsibility for managing Yolo County's water resources is currently distributed among a large and diverse group of public agencies. Moreover, several non-profit organizations have important roles in protecting and enhancing aquatic ecosystems. The WRA has succeeded in engaging these various entities in the shared development of this integrated plan. All of the participants in the process have gained a comprehensive view of the issues and the opportunities that will affect outcomes in the coming years. But the success of this IRWMP will be measured by the extent to which the Integrated Actions are implemented.
