I live in the Pocket area, adjacent to Garcia Bend Park, and directly across the river from a proposed intake facility. We chose this location to buy a home, in large part, due to the quite environment. I hope your EIR includes how this project will impact humans, and our quality of life, not to mention our property values. From my bedroom window, I can hear the farmers dog, across the river, barking. I can hear cars driving on the South River Road. I can't imagine the sound of the construction, and ultimate operation, of the proposed pumping facility. Perhaps that's why the only other pumping facility this size, in the state, is located in an agricultural area in Redding. Hopefully, your EIR will include information on other states pumping facilities, within/adjacent to urban areas, and their adverse impact on those communities. Preserve our quality of life!!! If pumping stations are required, they should, like the Redding facility, be placed away from urban areas, having the least negative impact on humans. We oppose the 3/4 proposed pumping facilities adjacent to the Greenhaven/Pocket neighborhoods! Also, be honest. This has nothing to do with the environment, the Delta, or the Smelt (which, surprisingly, as of late, is not negatively effected by the intake pumps; how convenient). This is all about water, and water transfer; come hell, or high water.
